NEW Diesel Engine Forklift Trucks

Your satisfaction is our Priority
50/60/70D-7A

HYUNDAI

Full Equipment

Reliable KUBOTA V3800 engine

Efficient cooling system

High-output air conditioner

The new Job site master

The efficient and ergonomically designed
50D-7A / 60D-7A / 70D-7A are made to fit you needs.

Powerful and Proven **KUBOTA V3800 Engine**

Excellent torque on low idle makes the operator comfortable lowering the level of noise, vibration and smoke.
The enhanced lower fuel consumption rates will provide economic operation.
This engine meets EU stage IIIB and EPA Tier-IV Interim emission regulations.

78.7 KW / 2,200 rpm
38 kgf.m / 1,500 rpm

Full-automatic Transmission

The high quality ZF transmission has proven it's durability and ease of use together with soft and smooth gear changes.
The operator can select two stage of full automatic modes. (1stage : 1st <—> 3rd, 2stage : 2nd <—> 3rd)

Increased mast tilting angle

Utilizing the mast tilting angle of 15 degrees forward and 10 degrees backward gives the operator a safe and rapid platform for loading and unloading jobs.

Wet disc brake system

Wet disc brakes improve the brake performance and make your service intervals longer. Enclosed brakes are protected against dust and water.

Fully hydrostatic power steering

A hydraulic steering system always guarantees smooth and flexible steering, preventing overrun and steering wheel kick-back.

Key-locking fuel filler

Increased security on job sites using a locking fuel cap, plus an increased capacity fuel tank for less down time gives you optimum availability of your truck.

■ Photo may include optional equipment

Faster travel speed & better gradeability

The powerful engine combines fast acceleration with high travel speed and excellent gradeability.

Gradeability (Loaded)

50D-7A : 59 %
60D-7A : 50.6 %
70D-7A : 44.2 %

Travel speed (Unloaded)

50D-7A : 32.9 km/h
60D-7A : 32.8 km/h
70D-7A : 32.8 km/h

Comfortable operation!

A design based on human engineering relieves fatigue and increases operator's efficiency.

Operator friendly gauges and water-resistant monitor panel

USB MP3 player

Easily adjustable suspension seat

An attractive and adjustable seat, based on a human engineering design, provides great comfort, safety and durability.

High-capacity air conditioner & heater

Centralized Instrument switch Panel

Load Indicator (Option)

The weight of the load is displayed on the screen. The driver is alerted when he is overloading the machine.

Easy control levers

Newly applied hydraulic remote control system reduced operator's effort for MCV levers by half.

Adjustable steering wheel

Steering wheel can be adjusted by a lever on the right-hand side for the most comfortable operator position.

■ Photo may include optional equipment

Easy and safe shift lever

A single lever on the left side of the steering column gives the operator fast and easy control of speed and travel direction. The engine can only be started in case of neutral position of this lever.

Multi-function switch lever

A multi-functional switch lever gives easy access to lights and horn.

Ergonomical positioned pedals

Based on human engineering, the accelerator, brake and inching pedals are optimally positioned.

Improved parking brake

The electric power to travel will automatically be intercepted when parking brake engaged even if forward of reverse lever operated.

Safety through high durability!

Safety and durability are priorities in design of our equipment.

Strong and compact single body frame

Made of high-tension steel has a superior strength and protects the inner components from external shocks.

Highly durable split type drive axle

The durable drive axle provides fast travel speed and quiet travel under any heavy load condition, and boosts work efficiency.

Efficient cooling system

Aluminum radiator provides excellent cooling capacity with improved air flow.

Large footboard & handle

Wide "open" step offers convenience and safety when entering and exiting your truck.

Enlarged mirror

The enlarged mirror provides improved visibility ensuring safety. (185 x 320 mm → 260 x 340 mm)

Full lighting

In order to provide the driver visibility in all circumstances work lamps are standard both to the front and to the back.

■ Photo may include optional equipment

Expansion bellows

Sufficient length of bellows pipe between exhaust pipe and engine exhaust manifold certifies the durability of muffler and exhaust pipe.

OPSS (Operator Presence Sensing System)

Control of mast tilting, lifting and lowering and all of aux. functions are not possible through operation of the appropriate control when the operator is not in the normal position. (Option)

Grease fittings

Grease fittings are installed for easy access to steering axle center pin when doing service checks.

Centralized design for easy service!

An ideal arrangement of components ensures easy access for service and maintenance.

Large engine hood
Highly accessible engine compartment assures fast and efficient maintenance.

Dual element air cleaner (8")
The air filter is readily accessible for cleaning or replacement. The large size of air cleaner extend the life time of engine.

Cabin air fresh filter
The pressure inside the cabin is slightly higher than outside. This excludes dust from the cabin and reduces noise levels.

Cabin Tilting automatic system

Cabin tilting electronic system makes servicing of all power train components quick and easy. An electrically assisted hydraulic actuated cylinder tilts operator cabin to left side about 54 degrees for easy access to inside of truck components.

Mechanic Friendly Fuel Filter Replacement

Highly accessible engine compartment allows for quick replacement of filters.

Electrically monitored air filter

To avoid any damage, a sensor alerts the driver when the air filter is clogged.

Compact fuse box for easy inspection

■ Photo may include optional equipment

Maintenance free battery

Easy-to-access reservoir tank

Large tool box
Additional tool box located on machine side for operator's convenience.

Wing cover locking system
